C SERIES

CUSTOM SIZES FOR ALL SHADE TYPES

DESIGNED TO DISAPPEAR

Blindspace® C Series pockets can be made to any size, to conceal all types of shades, achieving minimal visual impact. The pocket is installed during construction with the space accessible for shade installation once the room is completed. It features the patented Blindspace® Safety Hinge that secures the closure in place and can be installed in any direction. This works together with side pockets to hide shade side channels and/or guide wires.

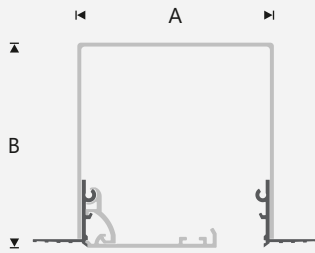

Custom C Series pockets are used for very large shades, double shades, gable shades and skylight shades. C Series pockets can also be installed to future-proof buildings to have the option to install concealed shades later.

Description

Concealment system to hide roller shades or to future-proof windows for installation of shades, with safety hinge that secures the cover in place.

Material & Finish

Raw aluminum
Matte Black on the inside of pocket
White on the outside of pocket

FEATURES

Seamless appearance after painting

Plaster is feathered over skim coat flanges to hide the box leaving only a thin hairline between the ceiling and the Blindspace® closure.

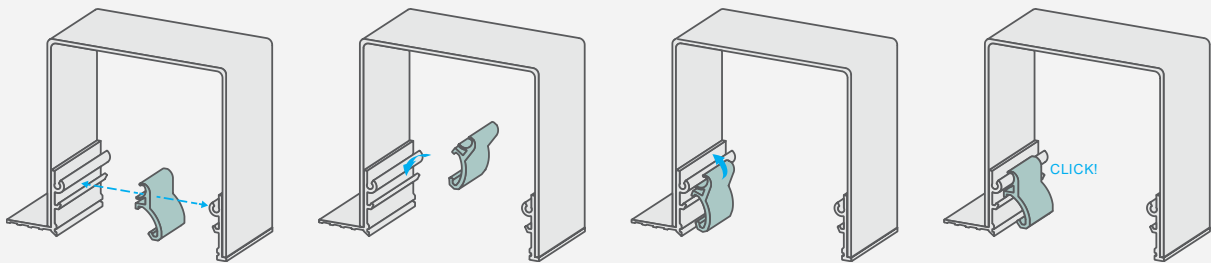

Safety hinge securing the closure in place

The safety hinge can be installed on either side of the box and ensure that the cover is not falling to the floor if accidentally opened.

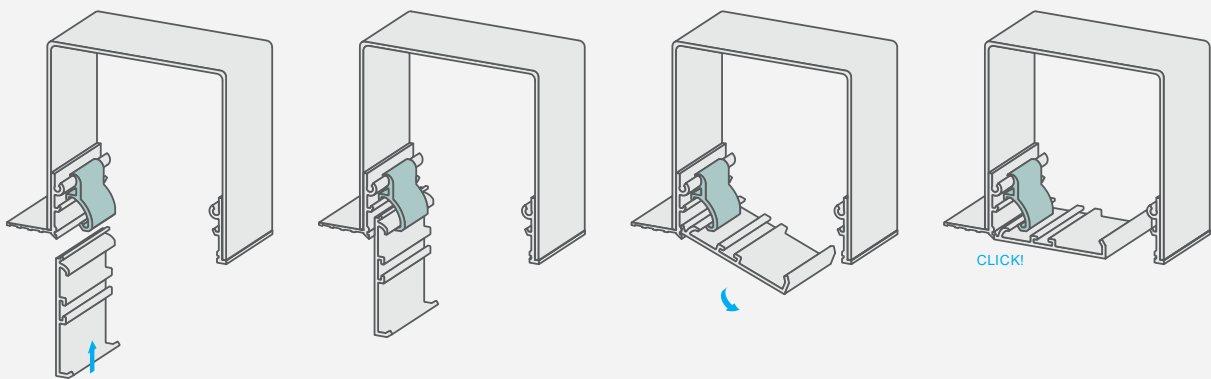

Available in ten foot lengths with custom cutting services

Blindspace pockets and closures are supplied to our customers in ten foot lengths. Splice pins and plates are supplied to align multiple boxes and covers. Custom cutting services are available for shorter lengths.
